Rhubarb

Red Berry

Roasted Pepper

Pomegranate

Dandelion

Thistle Green

Concord Blue

Blueberry

Maple Syrup

Malt Brown

Root Beer

Black Orchid

## IMPORTANT NOTES:

The Bomanite Concrete Dye colors are shown with the Bomanite Custom Polishing System - Patène Teres. The final shade and appearance of Bomanite Concrete Dyes will appear unique to each individual concrete or topping substrate and may differ from what is shown on this chart. Bomanite Concrete Dye will exhibit a wide range of shades depending on many factors including, but not limited to, finishing techniques, mix designs, percentage of aggregate exposure from grinding, curing and sealing practices, concrete discoloration from previous floor coverings or coatings, age and condition of existing slabs, concrete color, surface porosity, dilution rate and product used to dilute the dye. Bomanite Concrete Dye generally yields fairly consistent results provided the concrete is mechanically ground prior to application however it is strongly suggested to sample the actual surface that is to be stained in an inconspicuous area. Refer to the Bomanite Concrete Dye Technical Bulletin and Application Guideline for additional information and product limitations.

It is highly recommended that samples be created, viewed and approved using construction techniques and materials identical to those that will be used in the actual construction of the project. This sampling process must be completed prior to specifying the final color and appearance.
